

Vendor Risk and Acquisition

Performing an on-site risk assessment after initial standardized questionnaire review and analysis is key to complete program development. The on-site review includes: Security policy document review, on-site assessment that includes staff interviews, physical inspection and document review ensuring the most rigorous review prior to final contract signing.

Rely on Treadstone 71 as your trusted advisor to assess partners, suppliers and other vendors. Treadstone 71 offers a scalable risk assessment method on behalf of your organization. Not only are we experienced in 3rd Party assessments, we have in-depth experience in pre-merger/acquisition assessment activities that can be quite sensitive. Treadstone 71 will help you establish periodic technical, job-specific and job-related training is conducted on an as needed basis for all IT employees and contractors. This specialized training may take the form of vendor seminars, security-related product demonstrations and conferences, professional technical association and user group meetings, which provide specialized or job-related IT security-related topics or discussions.

Treadstone 71 utilizes ISO27001/2 as our standard risk assessment framework. Treadstone71 also provides assessment reviews based upon the BITS framework non-inclusively and we can adapt to most any regulatory requirements or established organizational standards.
